## Cold

## **Matchbox Twenty**

I will do without The spaces in between If you can tell me now What it means to be

You have been found out I have been deceived By the one that I need

Tell me why you gotta be so cold How'd you get so high Why you're keeping me low You dont know, you don't know Tell me how we're gonna make it last You're ready to fly I'm ready to crash Don't go, don't go, no

You will go without A better part of me There will be no doubt What this all could mean You will be found out I can not believe In the one that I need

Tell me why you gotta be so cold How'd you get so high Why you're keeping me low You don't know, you don't know, don't know And tell me how we're gonna make it last You're ready to fly I'm ready to crash Don't go, don't go away

Tell me why you gotta be so cold How'd you get so high Why you're keeping me low You don't know, you don't know, you don't know And tell me how we're gonna make it last You're ready to fly I'm ready to crash Don't go Yeah, don't go

Tell me why you gotta be so cold Tell me anything about you I don't know I don't know by now Know by now Tell me how we're gonna make it last You're ready to fly I'm ready to crash Don't go Yeah, don't go
