## **Gotta Get A Problem**

**Mates of State** 

Why must we open all other doors We tied them up well 'Cause I don't want to live with two Unless we remember one second more We tied them up well

I break it down Break it up to the ground Some branch it out, staking out all the sound

Who bumped it up, bumped it up, bumped it, who? I sat around tonight with the rocks and the ghosts in the yard We sat around tonight And out of the thinking air, one of us doesn't care

And we sat around tonight Who bumped it up, bumped it up, bumped it, who? With the rocks and the ghosts in the yard Who is, who is, who has known us? We sat around tonight Who bumped it up, bumped it up, bumped it, who? And out of the thinking air, one of us doesn't care

I break it down Break it up to the ground Some branch it out, staking out all the sound And out of the thinking air, one of us doesn't care
