

# Light The Way

Cab, Matt

Intro:

I can light up the way like a candle in the night  
I can be the flame to fight against the cold  
If you take my hand, I can lead you through the dark  
And together we can light the way  
We can light the way  
We can light the way  
We can light the way  
We can light the way

Verse 1:

When the sky is dark and the clouds won't seem to lift  
Your patience's wearing thin  
I will climb the highest mountain  
To shine a ray of hope

Pre-chorus:

When you're down and your spirit's broken  
I will be there to wipe the tears from your eyes  
Rain will fall though when the storm is over  
The sun will surely rise

Chorus:

And we will light up the way like a candle in the night  
We will be the flame to fight against the cold  
If you take my hand, I can lead you through the dark  
And together we can light the way  
We can light the way  
We can light the way  
We can light the way

Verse 2:

When your will is lost, you don't know which way to go  
You can count on me  
'Cause together we will find the answer,  
The strength to carry on

Pre-chorus:

When you're down and your spirit's broken  
I will be there to wipe the tears from your eyes  
Rain will fall though when the storm is over  
The sun will surely rise

Chorus:

And we will light up the way like a candle in the night  
We will be the flame to fight against the cold  
If you take my hand, I can lead you through the dark  
And together we can light the way  
We can light the way to a brand new day  
We can light the way, it's gonna be okay  
We can light the way  
Light the way

And we'll come out even stronger  
We will rise again to fight another day  
Through the darkness we'll burn brighter if you believe

You light up the way like a candle in the night  
You can be the flame to fight against the cold  
If you lend a hand, you can lead us through the dark  
And together we can light the way  
We can light the way
