

Northeast

Matt & Kim

The northeast
It's all I really know
With dust and bricks and some cars in the snow

It's like New York in the late summer time
Can breathe again even through this lovely grime

As I said, the skyline's brighter tonight
But this time I turned on 5 more lights

It's like New York in the late summer time
Can breathe again even and your bones they feel alive

I've got the northeast on my side
