

Green Grass

Matt Pond PA

look captured - but calm behind your eyes - why you try
You break my heart and I can't evolve
With nature - there's so much less to mind - why you lie
You break my heart and I can't evolve

on the green grass on the green grass
Under starlight starlight

but this nature - has to be denied - why I try
And it breaks my heart - that I can't evolve
I've settled - I've given up desire - why I lie
And it breaks my heart - that I can't evolve

on the green grass on the green grass
Under starlight starlight
