

Take You Higher

Matt Webb

Brittle one, brittle one, little one in the wind
How many, how many storms have you been in
Don't be, don't be spooked, don't you try to resist
I can see, I can see you are more than ready for this

I can take you higher
You're always safe with me
I can take you higher
I'll be your ecstasy
If this is desire
I'll give you what you need
I can take you higher
Don't you be scared
There's nothing for you baby down there

If you wanna go start run, run, running away
I'm not going to chase you like they chase you cuz i don't want to play
Don't be, don't be fake when you need to be real
I can wait, I can wait then I'm going in for the kill

I can take you higher
You're always safe with me
I can take you higher
I'll be your ecstasy
If this is desire
I'll give you what you need
I can take you higher
Don't you be scared
There's nothing for you baby down there

You go the way that you want to
So brittle they could break you
You go the way that you want to
So perfect, they foresake you

They foresake you

I can take you higher
You're always safe with me
I can take you higher
I'll be your ecstasy
If this is desire
I'll give you what you need
I can take you higher
Don't you be scared
There's nothing for you, baby, down there
