Like the Last Time

I can feel you Slippin' through my hands And I can't stop it And that's what gets me scared It's in my leaving That the sames begin to tear But we made it once and we'll make it through again CHORUS: And Hey, We'll be fine just like the last time, baby. And you say, we'll be fine just like the last time, fine just like the last time, baby I can't tell you What you mean to me You're my constant You're my consistancy Everyone's changing I barely recognize this town You gotta promise me That you'll always be around
