## **Sure Fire Love**

## **Maxi Priest**

Said, I'm needing you more well Said, I'm needing you more, oh, girl

The way you say it in your kisses, darling In everything you do, I just have to talk about you You're there when the sun comes up At night you make my dreams come true Those little things that you do

And if I go away more than a day or two Each time I close my eyes I say a little prayer for you

We've got a sure fire love, sure fire love The more I think of you, oh darling We've got a sure fire love, sure fire love Don't change the things you do, yeah

We'll talk about the weather darling 'Cause the way I feel inside There's nothing but blue skies And if we spend a little time together That's how we keep our love alive, oh well

And if I go away more than a day or two Each night I close my eyes I say a little prayer for you

We've got a sure fire love, sure fire love The more I think of you, oh darling We've got a sure fire love, sure fire love Don't change the things you do, yeah

And if I go away more than a day or two Each time I close my eyes I say a little prayer for you

We've got a sure fire love, sure fire love The more I think of you, oh darling We've got a sure fire love, sure fire love Don't change the things you do, yeah

We've got a sure fire love, sure fire love The more I think of you, oh darling We've got a sure fire love, sure fire love Don't change the things you do, yeah

I love you the way you are, girl I love you the way you are, yeah Oh, girl, I love you
