

Even Robots Need Blankets

Mayday Parade

It happens every time
If it counts I'll lose my courage
When I need it the most
Then it comes crawling up after
Begs me to ask her what I already know

Singing "Oh, love get me out of the cold"
If I promise that I take you there with me
Would you go
I found in one step I'll get closer to heaven
Than you'll ever know
You may never know

Feeling out again
Go and try to be your man
When there's a gun to your head
After you've found out your good enough
Wasn't good enough for everyone else

Singing "Oh, love get me out of the cold"
Hold me right by the fire and I'll show you
What home means now
The words came with a new kind of sadness
They meant everything, you mean everything to me

I'll take the first train out of this town
With a glare in my eye and my pockets full,
Ready to die
And when I get hazy I will think just maybe
You're out there somewhere

Singing "Oh, love get me out of the cold"
If I promise that I take you there with me
Would you go
I found in one step I'll get closer to heaven
Than you'll ever know
You may never know

Singing "Oh, love get me out of the cold"
Hold me right by the fire and I'll show you
What home means now
The words came with a new kind of sadness
They meant everything, you mean everything to me
