

# One of Us

Mayday Parade

I just gotta tell you one last thing  
How the angels make their way home  
I saw it carved into a headstone  
That came to me so suddenly  
Right there  
And this temporary body we call home  
You get the most if you don't look back  
You get the most if you save it up

You want fire, I've got fire, girl  
And things that seem impossible until you get to know me

You're one of us, here's exactly what you'll need to make it through  
Good times and hard times  
We're here to fight for you  
March along  
Don't forget to tell the ones you love they matter  
When you break the bend  
Fall off again  
You'll find your love where it's always been

You've gotta fight the beast inside  
And all the while enjoy the ride  
You've gotta keep an open mind  
And willingness to change  
Well God knows I've changed  
I talk like I'm wounded now  
I walk like I don't know how  
Maybe I could re-teach myself  
One foot in front of the other one

You're one of us, here's exactly what you'll need to make it through  
Good times and hard times  
We're here to fight for you  
March along  
Don't forget to tell the ones you love they matter  
When you break the bend  
Fall off again  
You'll find your love where it's always been

(2x):

I will carry my heart back home now  
This place doesn't hold any secrets anymore  
Feels like I didn't fight  
Didn't give it all I could and now it's gone

One of us cares exactly what you'll need to make it through  
Good times and hard times  
We're here to fight for you  
March along  
Don't forget to tell the ones you love they matter  
When you break the bend  
Fall off again  
You'll find your love where it's always been
