

Designer Drug

Mayer Hawthorne

Last night I tried a little Adderall
It was working for a while
Until I thought about your smile

I got that fire cali medical
But it never gets me high
Baby only you know why
Cause darling

You, you are
My designer drug
And only you
Can help me
And I can't get enough

I sip that ginger ale and Hennessy
But every drink inside my glass
Just makes me think about the past

I tried that MDMA ecstasy
And it only brought me down
But know whenever you're around
I know that

It's like you're made inside a laboratory
Just for me

Only you
You can help me
Oooh
