

## If You Need A Friend

Maywood

Whatever it takes, I'm gonna be right beside you  
I know you'll understand one day, baby  
You can make it alone, I wanna be there to guide you  
So please don't send me away  
I see that sad look in your eyes  
But maybe we can find our paradise

If you need a friend  
You can always count on my love  
If you're down and out  
Just cry out loud for my love  
I will help you on your feet  
So if I'm the one you need  
Here's my, here's my love

Turn on the light, let's get the party started  
For old time's sake, yeah  
Many a nights, you left someone broken-hearted  
There'll be no more hearts to break, no  
We have been waiting for too long  
Now there's a dream to build our world upon

If you need a friend  
You can always count on my love  
If you're down and out  
Just cry out loud for my love  
I will help you on your feet  
So if I'm the one you need  
Here's my, here's my love

If you need a friend  
You can always count on my love  
If you're down and out  
Just cry out loud for my love  
'Cause I will help you on your feet  
So if I'm the one you need  
Here's my, here's my love
