

What Goes Up

Maze

Do you know everything you do
Has a reaction in kind
What you give is what you get
Since the beginning of time
If you hurt someone it's fair to say
Sooner or later it's comin' back your way
You can't play games without any risk
Better beware and remember this

What goes up must come down
The things you do come back around
I know cause I found
What goes up must come down

Some people hate and they wonder why
Things are not better today
People get what they deserve
Most of the time anyway
Sometimes you win but you could lose
That's all right you can't change the rules
If it ain't one thing it's gonna be two
As long as you live and you know it's true

What goes up must come down
The things you do come back around
I know cause I found
What goes up must come down

Like the sunshine turn to night
Sometimes you wrong
Sometimes your right
Let there be no doubt
It'll all work out

What goes up must come down
The things you do come back around
I know cause I found
What goes up must come down
