

# Take Me There

**McFly**

I don't ever wanna spend another day without you  
Without you  
I don't think that I'd be standin' here if I never found you  
Never found you  
Right now the sun is in your eyes  
The moment has arrived, you see  
Right now, there ain't no better time  
I feel like you're alive to me

When you take me  
When you take me  
When you take me there  
When you take me  
When you take me  
When you take me there

I get anxious just to know that you're the one I come home to  
Come home to  
Being without you makes me suffocate  
Cause baby I breathe you  
Yeah, I breathe you  
Right now the sun is in your eyes  
The moment has arrived, you see  
Right now, there ain't no better time  
I feel like you're alive to me

When you take me  
When you take me  
When you take me there  
When you take me  
When you take me  
When you take me there

Right now the sun is in your eyes  
The moment has arrived, you see  
Right now, there ain't no better time  
I feel like you're alive to me

I feel like somethin' is special here  
But I feel like somethin' is special  
I feel like somethin' is special here  
But I feel like somethin' is special  
With you

When you take me  
When you take me  
With you  
When you take me there  
With you  
When you take me  
When you take me  
With you  
When you take me there  
With you  
When you take me  
When you take me  
With you

When you take me there  
With you  
When you take me  
When you take me  
With you  
When you take me there  
With you

I feel like something is special here  
But I feel like something is special  
With you  
I don't ever wanna spend another day without you  
Without you
