

# I Know

Meaghan Smith

It's in our hello  
In the way your smile glows  
It shows in your eyes  
In the tear in our good bye  
And all in between  
When you're lookin' at me

I know I know I know  
What you can't say

It shimmers through  
In the little things you do  
When you write me a note  
Send it by the post  
What you might not sign  
On that bottom line

I know I know I know  
What you can't say

Words are not needed  
And though my ears can be misled  
My heart can hear instead  
What goes unsaid

You'll leave me with this  
A hug and a kiss  
And that little phrase  
You can't seem to say  
But please don't feel blue  
Cause I always knew

I know I know I know  
And I love you too
