Down To The Spark

Your eyes burn like a candle They flicker off of the wall You will Lie Awake 'til dawn And hold your breath in your hands (In your Hands!) We well light not candles of our own Until we find the darkened spark Until we find the darkened spark GO! I can't forget the spark you've spoken to me Where new worlds begin, my heart it leaves a trail to be followed Down to the spark Down to the darkening corner (Corner!) And all that I can say is that my heart melts Like wax right onto the ground before you Down, Down to the spark Down, Down to the spark This dialogue of hope and loss resounds Can you hear it? Will you sing along? This dialogue of hope and loss resounds Where did we begin? Was it not at the spark? Where did we begin? Was it not at the spark?
