

Can you visualize the consequences
That we patronize?
But it's alright, you're too far gone
Just realize
Taste the spice of life and you'll feel fine
Together we can climb
But it's alright, there's nothing there
Did you realize?

Yeah, my placebo will put you in Disneyland
We'll be in heaven, it will make your mind expand
Yeah, my placebo, unreality overrides
We'll be in limbo for the rest of our lives

Rise above yourself, get higher, feel on fire
Your desire will mesmerize
But it's alright, you electrify
It's getting hot
For the circular cosmic spot
It's getting too hot
For the circular cosmic spot
It's getting too hot

Yeah, my placebo will put you in Disneyland
We'll be in heaven, it will make your mind expand
Yeah, my placebo, unreality overrides
We'll be in limbo for the rest of our lives

Take a look at what you are
Take a look at who you are

Take a look at what you are
You can't ignore the fact it's dying
Take a look at who you are
I can't disguise the fact I'm trying
I know that we're too far gone
Just realize, it won't take long
Every man and woman is a star tonight

Time and time again, nothing makes sense
Time and time again, nothing relents
And time and time again, now it's alright
'Cause time and time again, it's out of sight
