## **Execute Me**

My body is dissolving I can taste it in my mouth The door is revolving I can't find my way out It feels like you killed me My lungs are airing out I don't need you to tell me That it's over know

Yes I feel the pain I know it might surprise you That I feel this way Can you see it in my eyes too When the beds are burned And the tables turned There's nothing left for you To do but, you to do but

Execute me For you I'll take a bow Execute me now Execute me, execute me Execute me now Come a little closer now I'm ready to take a bow Execute me, execute me, execute me now Now now now Now now now Now now now

I'm six feet under I dream of sunny skies But rain and thunder Keeps messing with my mind Yes I feel the pain Cause I can't survive you I'm not so insane I'm hard as memorised you

When the beds are burned Cause the tables turned There's nothing left for you To do but, you to do but

Execute me For you I'll take bow Execute me now Execute me, execute me Execute me now Come a little closer now I'm ready to take a bow Execute me, execute me, execute me now Now now now Now now now Now now now

Let me be

## Medina

Let my senses bleed There's nothing left to me So go on

Let me be Let my senses bleed There's nothing left to me So go on

For you I'll take a bow Execute me now Execute me, execute me Execute me now Come a little closer now I'm ready to take a bow Execute me, execute me, execute me now

For you I'll take a bow Execute me now Execute me, execute me Execute me now Come a little closer now I'm ready to take a bow Execute me, execute me, execute me now Now, now, now Now, now, now
