

Need Your Poison

Megan & Liz

How can you be what's killing me
When you are what keeps me alive
How can I know what's killing you
When I never know what you keep inside

You're my kryptonite
You're my wrong that's right
You're the poison I need
Takes every breath inside me
I can't get away
You're every thought in my head
Every word that you said
Please don't let me out
I need your poison
Need your poison now
Oh, I need your poison
Need your poison now

Why don't we start a fight
Just so we can feel
Just enough, good enough
I just need something to surround me
To drown me

Be my kryptonite
Be my wrong that's right
You're the poison I need
Takes every breath inside me
I can't get away
You're every thought in my head
Every word that you said
Please don't let me out
I need your poison
Need your poison now
Oh, I need your poison
Need your poison now
Oh, I need your poison

Call this crazy
Call this madness
Call this you and me

You're the poison I need
Takes every breath inside me
And I can't get away

You're the poison I need
Taste every breath inside me
And I can't get away

You're every thought in my head
Every word that you said
Please don't let me out
I need your poison
Need your poison now
Oh, I need your poison
And I need your poison now

Need your poison
Need your poison now
I need your poison
And I need your poison now
