

Snapshots (Best Days Of Our Lives)

Megan Nicole

(We're making memories we can live for)

Snapshots

You Better Stay Ready

'cause you miss a lot if you don't

Better Make it a video

'cause here we go.

(Are you ready? Let's go)

Tonight I feel like a million bucks

Dressed up ready to l-live it up

So tell the DJ to keep it up

Look around, Look around

'cause right now

We're making memories we can live for

Making every night a night to remember

Take it to the future we'll be looking back saying that these are
the best days of our lives

We're making memories we can live for

Making every moment feel like forever

Take it to the future we'll be looking back saying that these are
the best days of our lives

Take a shot 'cause I'm gonna party like

it's criminal like never before

I'm not thinking 'bout tomorrow,

just till the morning

(Can you do what I Do? Take Two)

Tonight I feel like a million bucks

Dressed up ready to l-live it up

So tell the DJ to keep it up

We are young only once

We are young only once

We are young

We're making memories we can live for

Making every night a night to remember

Take it to the future we'll be looking back saying that these are
the best days of our lives

We're making memories we can live for

Making every night a night to remember

Take it to the future we'll be looking back saying that these are
the best days of our lives
