

# Watch Me Work

Melanie Fiona

Sick of ordinary days you wanna scream and shout  
Feeling like it's time to change, get a little wild  
Come up from behind the shade, be a rebel child  
Gonna raise some hell tonight  
Cause it's alright, don't have to be afraid  
There's a spotlight, that's shining just for you  
Go the distance, then show 'em what we're really made of

Watch me work, something different, something new  
Watch me work, out the box, out the blue  
Watch me work, something sexy, something fine  
Watch me work, out the box, blow your mind  
Watch me work

Set the status quo in place, let them other burn  
Show them that you're here to stay, tell them watch and learn  
Time to put the wheels in motion, never to return  
Get on with myself tonight

Cause it's alright, don't have to be afraid  
There's a spotlight, that's shining just for you  
Go the distance, then show 'em what we're really made of

Watch me work, something different, something new  
Watch me work, out the box, out the blue  
Watch me work, something sexy, something fine  
Watch me work, out the box, blow your mind  
Watch me work

Time to break free from these chains  
I'm on a mission, wanna live my life today  
I thought I told you, I'm taking over  
Talk is cheap so it's better if I showed you

Watch me work, something different, something new  
Watch me work, out the box, out the blue  
Watch me work, something sexy, something fine  
Watch me work, out the box, blow your mind  
Watch me work

Something different, something new  
Out the box, out the blue  
Something sexy, something fine  
Out the box, blow your mind  
Watch me work
