

# Drag Me Away

Melissa Etheridge

Did you think I was leaving  
My ticket was just one way  
The angels I believed in  
Were gonna carry me away  
Did you think that I would simply  
Give them my last breath  
Well honey you've got me wrong  
I'd never leave you for death  
It's gonna take more than that to get rid of me  
It's gonna take more than that to make me fade  
They'll have to tie me up and drag me away  
They'll have to shut my mouth and drag me away

There is no one I serve  
I am not here to please  
I will not be a hostage  
To my own dis-ease

Oh Come on come on  
Come on out and hold me  
Out into the great sunlight  
No power on earth can stop us  
We'll both become one tonight

I have never been more sure of anything  
I have never been more sure of what I am  
They'll have to tie me up and drag me away  
They'll have to shut my mouth and drag me away

There's no dark that can overcome a flame  
There's no force that can drag me away  
They could bring an army  
Ten thousand men or more  
Their mass weapons of destruction  
Won't even up the score

Come on, come on, come on, come on, come on baby  
They'll have to drag me away  
Come on, come on, come on baby  
They'll have to drag me away  
They'll have to drag me away  
They'll have to drag me away  
They'll have to tie me up and drag me away  
They''''ll have to shut my mouth and drag me away  
There's no dark that can overcome a flame  
There's no force that can drag me away

No force that can overcome a flame  
There's no force that can drag me away
