Everything I Need

Men at Work

Moving up and down and from side to side With so many things to do I want to go again I want another ride This time should see it through

We never realized as the years rolled by No we never really had a clue But we knew one day we'd come alive And in the end there's me and you

My babe, she gives me everything She gives me everything I need

When the winter comes and the cold sets in As this city's prone to do They forecast heavy seas and gale force winds that's really nothing new

When I'm falling down Deeper than the underground My thoughts race back to you Again and again

My babe, she gives me everything she gives me everything I need

And if you think us fools And you criticize Then my friend the joke's on you

My babe, she gives me everything She gives me everything I need.
