

# I Sing Last / Not for Tears

Men Without Hats

We've been told lies. We've been herded around  
Taken for rides, told that this is the one  
We've learned all the steps and where do they lead  
Right back to zero or not far I believe

Making history as we open our eyes  
And no one's quite sure so we... We improvise  
And wherever it leads us is wherever we'll go  
I'd dance forever if they'd let me, you know

Wearing our hair up in anger we cry  
The revolutions dead it went out in style  
The children are learning much faster than we  
Soon they'll be older but then again, so will we

Time has come for each of us to decide  
To follow blindly or to step out of line  
The party is over it has been for years  
Let's use the water to wash up, not for tears

Seems such a pity  
It seemed we had the same dream  
And thinking of things past  
You sang first I sang last  
You sang first I sang last  
You sang first I sang last
