## **Fuel The Fire**

Toal insanity We are falling into nothing We`re at war this war evermore We wont be the same We are sinking into silence We are feeding from the liars To the end of the earth We march unto this war

Take your laws of life and rewrite them Nothing that you say is the truth you're vile Ive seen it all in the eyer of deceitful Pray you live tonight

Fuel the fire raging through us all I can taste the sick inside I`m promising you I wont take this My hatred grows Fuel the fire if you dare I will not stand you as dictator

We wont taste defeat
