

## Our War

Mendeed

Is this what you came for?  
Take your only shot

You're hiding it all this time  
Hiding what you were disguised as friendship  
Knives are twisting but I smile in spite of you  
I would've died for you but you took this time from me  
I don't know all the signs but I don't give a fuck

Fire inside of me break me if you can  
Bodies burning by the side of another  
But you're never gonna take us down  
Fire in the soul take now that you can  
Build up all the armies and tear down all the cities  
But you don't know where I am

I`m thinking that you're not gonna make it  
I am hoping that you'll fall in this life to me  
Can't run forevermore I will  
Go back and take this time from you

No regrets  
Nothing ever sets this free  
This is our war
