## I Just Wanna Be Happy

## **Mental As Anything**

When you have too much pleasure
In the course of the night's activities
You have to be very clever
Avoiding the bad effects of these
I just want to be happy
Don't want to be sad
Don't want to be too possessive
You're the girl that I should always have

You might be feeling silly
Unable to converse properly
This could be of damage
To your social acceptability
I just want to be happy

Don't want to be sad
Don't want to be too possessive
You're the girl that I should always have

All my friends might come around And try to make me feel so good But I can't find relief in there Cause both my arms are made of wood I just want to be happy

Don't want to be sad
Don't want to be too possessive
You're the girl that I should always have

Falling over the furniture
Your head is starting to spin
You'd better leave pretty smartly
Or the host won't be asking you back again
I just want to be happy

Don't want to be sad
Don't want to be too possessive
You're the girl that I should always have
