Fly

Yes, I see the tears you cry I know you're hurting deep inside Drowning in a sea of memories Of the way things used to be

You sit at home all by yourself So no one can hear your cry for help I just don't understand why You put yourself through this Over and over again Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

I have the key to your happiness So you don't have to settle for less Just give me the chance to show you What's it's like to be loved, babe (Oooh)

You sit at home all by yourself So no one can hear your cry for help I just don't understand why You put yourself through this Over and over again

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Baby, what I'm trying to say You're the most precious thing that God has ever made It's not your fault you were treated that way (treated that way) So wipe the tears from your face It's gonna be okay

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Baby, don't ever let anyone hurt you You're too beautiful to be all alone And I know it's hard Hard for you to see it Just open your eyes Spread your wings and fly

Fly (Just fly)
Fly
Fly
Oh Fly (Spread your wings and fly)
Fly (Yeah)
Fly (Don't cry no more)
Spread your wings and fly
