

# Seize the Night

Mercenary

Nosferatu...  
Gone in six six seconds, ticking away  
As the sun soon sets  
The corner stone of my regrets  
The shadow shades me always...

I am reduced to darkness  
The burden I never lost  
Nocturnal heartless  
I've never seen the day

Like father like son  
I inherit the chronicle  
The heritage continues  
Like mother like daughter  
The witches of underworld  
Burned at the stake a long time ago

So now I hunger  
For the taste of new blood  
I am the lonely hunter  
Come follow me as I...

Seize the night  
The epidemic awakes me  
In transformation  
I spread my wings, and drift away  
Draculation  
The countless necks, I have poisoned  
Carpe nocte  
I've never seen the day anyway

I close my eyes to what's not there  
I think it's strange you never knew

Silently watching  
from my steel black coffin  
My arms lay crossed  
I await another flight  
That takes me one step closer, to light  
The smell of blood enchants me

I am reduced to darkness  
The burden I never lost  
Like a poison ivy  
Come follow me as I...

Seize the night  
The epidemic awakes me  
In desperation  
I spread my wings, and fly away...  
Draculation  
The countless necks, I have poisoned  
Carpe nocte  
I've never seen the day anyway...

My soul perished, as my mirror reflection vanished

Been born 2000 years ago  
I'm the brother of Jesus...

The shadow that shades me  
And keep me forever black  
The light surrenders upon my domicile  
The cross of Christ  
The twin that blinds my bloodshot eyes  
Like garlic that penetretes my skin  
Awaken me

Everblack  
You never spoke to me  
Your demon heart  
And your evil ways

Seize the night  
The epidemic, awakes me  
In transformation  
I spread my wings, and drift away  
Draculation  
The countless necks, I have poisoned  
Carpe nocte  
I've never seen the day anyway...
