

# Welcome the Sickness

Mercenary

I fall, I fall beneath these remains  
To crawl until my knees bleed

Inflicting pain  
Upon my hollow shell  
This is my torment  
My personal hell  
Forever to be inflicted  
Welcome the sickness

Become the pain  
Demise  
Feel the fire  
Inside the worms  
They turn  
Bleed your desire

Is this really the end  
Is this really the end  
Is this really  
Is this really  
Is this really  
The end

I crawl, I crawl on broken knees  
To die upon my misery

Injecting shame  
A needle full of hatred  
This is my vengeance  
My personal hell  
Forever in this sickness  
Never forgiveness

How long will we decay  
How much longer can we stand  
One man's loss is another's pain  
Another strain upon this life  
That we obtain

What is this hell I must put you through?  
To define the scars you inflicted
