

# Finish What He Started

MercyMe

I don't have to know you  
To know that you will go through hard times  
It's just part of life  
Don't let that moment blind you  
And don't let it define you  
Take heart, that's not who you are

Our god is able, more than capable  
And to be faithful until the end  
Of it has finally started

No matter what you've done  
Grace comes like a flood  
There's hope to carry on  
He'll finish what he started  
No matter what you face  
His mercy will not change  
He's with you all the way  
He'll finish what he started

Remember you're forgiven  
So there's no need to give  
Into the light, you're qualified

Our god is able, more than capable  
And to be faithful until the end  
Of it has finally started

No matter what you've done  
Grace comes like a flood  
There's hope to carry on  
He'll finish what he started  
No matter what you face  
His mercy will not change  
He's with you all the way  
He'll finish what he started

This world can started in the now  
His faith is now completed  
A promise we'll see when he cried out  
It is finished

No matter what you've done  
Grace comes like a flood  
There's hope to carry on  
He'll finish what he started  
No matter what you face  
His mercy will not change  
He's with you all the way  
He'll finish what he started
