Time Waits For No One

Meredith Brooks

Days go by, nothing stays the same
As you and I move on, move on
Tonight is tomorrow's memory
Who knows where we both may be by dawn

Time goes on and on and on and Time waits for no one Don't let it pass us by Time waits for no one It goes on and on

Touch me now, baby, keep my kiss
And show me that you're real
We just have this time together
Can't say whether we will ever be, you and me

Time goes on and on and on and Seize the moment, here between us Only stars above can see us now Time goes on and on and on and
