

## Stars Collide

Merril Bainbridge

We can now make the stars collide  
If we really want to  
And turn the whole thing upside down  
Through endless days eternal night  
We could last forever  
Or just until we hit the ground  
Time goes by  
But together you and I  
We could see the end of a century  
Walking by the light  
Of the milky way tonight  
By the light  
Of the milky way tonight  
So many people left behind  
Still we seem to be here  
It's just a wave we have to ride  
And all the pieces in your mind  
Just like stars colliding  
So bright they almost burn my eyes  
Time goes by  
But together you and I  
We could see the end of a century  
Walking by the light  
Of the milky way tonight  
By the light  
Of the milky way tonight  
If we fall too far  
We might never see the stars  
If we climb too high  
I won't see you by the light  
Of the milky way tonight  
By the light  
Of the milky way tonight
