

It Scares Me

Mesh

Pull me 'round
And tell me that you'll never let me drown
Touch me slow
Like your fingertips might never let me go

But you know
That I'm caught between the magic that you gave to me
And the fear that you might leave
Because it
Scares me

Stop this war
I wish that we could leave things at the door
These feelings don't wash away
I wish there was more to me
More to say
More to say

But you know
That I'm caught between the magic that you gave to me
And the fear that you might leave
Because it scares me
That you could break my heart again so easily
Don't let us fall apart

Because it scares me
That you could break my heart again so easily
Don't let us fall apart

Run me through
Then pick me up and tell me what to do
Cut me
Then run away
I wish that there was more to this
Flesh to kiss
Flesh to kiss
