

Safe With Me

Mesh

This is my space
No one can ever get in here
This is my place
No one can ever hurt me

Standing at the foot of your bed
Counting the holes in your head
Waiting for the breathing to fall
Tracing the cracks in the wall

You don't know I'm there
You'll never know I care
But who's going to keep you safe
When your window is open
Reach out and I'll be there

Whatever happens to you
You're safe with me
Whatever hurting you do
It won't hurt me
Whatever choices you've made
To seal your fate
You've made them much too late

Watching from the edge of this tomb
That crushes your breath with its fumes
Silence like the beat of your heart
Dragging you into the dark

You don't know I'm there
You'll never know I care
But who's going to watch you sleep
when the latches are broken
Reach out and I'll be there

Whatever happens to you
You're safe with me
Whatever hurting you do
It won't hurt me
Whatever choices you've made
To seal your fate
You've made them much too late

This is my space
No one can ever get in here
This is my place
No one can ever hurt me

This is my space
No one can ever get in here
This is my place
No one can ever hurt me

You don't know I'm there
You'll never know I care
But who's going to pick you up
When your body is broken

Breath out and I'll be there

Whatever happens to you
You're safe with me
What ever hurting you do
It won't hurt me
Whatever choices you've made
To seal your fate
You've made them much too late

Whatever happens to you
You're safe with me
Whatever hurting you do
It won't hurt me
Whatever choices you've made
To seal your fate
You've made them much too late

This is my space
No one can ever get in here
This is my place
No one can ever hurt me.
