

Chance Of A Lifetime

Mest

The end of the world's in front of me
Hard to believe all I see
It comes so close but pulls away
To let me stay another day

It's one chance in your lifetime
But it won't be the last time
It seems theres always the next hill to climb
And you know there's a lifetime

The things that I see never end
Trickin' my mind to just pretend
I understand what's happening
When others doubt you still believe

It's one chance in your lifetime
But it won't be the last time
I swear theres always the next hill to climb
And you know there's a lifetime

Changing what I once thought
Letting go of what I once fought
There's a life that you need to find
All that surfaced has changed my mind

The end of the world's in front of me
Hard to believe all I've seen

It's one chance in your lifetime
But it won't be the last time
I swear theres always the next hill to climb
And you know there's a lifetime
