## **Girl for Tonight**

When was the last time I saw you Who would have known I'd still be blue I'm getting up and movin' on Cuz I've been drinking here for way to long

You'll be my girl for tonight Just tell me things will be alright You'll be girl for tonight Just tell me things will be alright You'll be my girl for tonight

Haven't felt real love in so long My true love left me and she did me wrong When I'm alone I feel the pain So I'll get drunk and find a girl to keep from going insane

You'll be my girl for tonight Just tell me things will be alright You'll be girl for tonight Just tell me things will be alright You'll be my girl for tonight

I hope tonight will never end With this angel that heaven sent I hope tonight will never end With this angel that heaven sent That heaven sent

You'll be my girl for tonight (be my girl tonight) Just tell me things will be alright You'll be girl for tonight Just tell me things will be alright You'll be my girl for tonight You'll be my girl for tonight
