

Without You

Mest

I warned you I told you I'd be better without you
But you didn't care you
Told me I'd go nowhere if I didn't have you
But where are you now

I haven't seen you around you know where to be found
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up

Thoughts of happiness
Only when you reminisce
Cause now that things are bad
You think of what you could've had

Think of the years they spent
With no money for the rent
From the bottom to the top
They stuck to their guns they'll never stop

Cause I warned you I told you I'd be better without you
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up

Now everyone has changed
But somehow you stayed the same
A life lesson has been learned
Your past came back and you got burned

What you done you try to hide
It's time to swallow your pride
You'll never change and I can see
When you said at least you're makin money from me

When I warned you I told you I'd be better without you
But you didn't care you
Told me I'd go nowhere if I didn't have you
But where are you now

I haven't seen you around your no where to be found
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up

And I wonder where you are sometimes
And I wonder where you are
Right now

I warned you I told you I'd be better without you
But you didn't care you
Told me I'd go nowhere if I didn't have you
But where are you now

I haven't seen you around your no where to be found
I wonder what happened to you
All the insecurities built inside of you

How do you feel now

I warned you I told you I'd be better without you
But you didn't care you
Told me I'd go nowhere if I didn't have you
But where are you now

I haven't seen you around your no where to be found
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up
