

Call the Banners

Metal Inquisitor

Many light years far from here
The sound of wolves is getting closer to my ear
A place of witchcraft of rising fear
The screams of whisper: they are coming nearer

One by one, they have an oath to swear
Titan force, the king is near

Call the banners, and you'll stand by my side
Call the banners, so we'll defend your pride

An epic story of war and peace
We want the bastards on their bloody knees
Soldiers of fortune, the swords to feel
We give command now their skins to peel!

One by one, they have an oath to swear
Titan force, the king is near

Call the banners, and you'll stand by my side
Call the banners, so we'll defend your pride
Call the banners, together we'll ride
Call the banners, united we'll fight

One by one, they have an oath to swear
Titan force, the king is near

Call the banners, and you'll stand by my side
Call the banners, so we'll defend your pride
Call the banners, together we'll ride
Call the banners, united we'll fight
