

## Time Bomb

### Methods Of Mayhem

Over again it plays  
I'm not scared to face the wreckage of my younger ways  
Every little thing you do  
It's measured by the damage that it does to you

You can screw me around  
You can swallow me down  
Well I don't really know why  
All we do is get high  
Guess I'd rather just save my breathe  
The world is just a time bomb  
Everyone is dead wrong  
And all this weight is on my head My head

Everyone you think you know  
It turned to something different only yesterday  
All of us need to choose  
It's easier to give in than it is to lose

They can blow up our head  
They can leave me for daed  
But I don't really know why  
All is said is goodbye  
Guess I'd rather just save my breathe  
The world is just a time bomb  
Everyone is dead wrong  
And all this weight is on my head My head My Head

Everything takes so long  
Everyone waits so long  
I don't really know why  
All we did is get high  
Guess I need save my breathe  
The world is just a time bomb  
Everyone is dead wrong  
And all this weight is on my head My head
