

# The Shade

Metric

I'm following the sun  
That's setting in the West  
We're floating on a bed of fading lights

A canopy of trees  
Bears witness to the breeze  
I'm falling like a feather, soft and light

Baby, there's no better time  
No better time, baby, we can't find  
Oh-whoa-whoa, oh-whoa-whoa

With eternal love, the stars above  
All there is and ever was  
I want it all, I want it all  
I want it all, I want it all  
A blade of grass, a grain of sand  
The moonlit sea, to hold your hand  
I want it all, I want it all  
I want it all, I want it all

The embers of a fire still burning as they die  
Stay bright to keep us side by side

Baby, there's no better time  
No better time, baby, we can't find  
Oh-whoa-whoa, oh-whoa-whoa

With eternal love, the stars above  
All there is and ever was  
I want it all, I want it all  
I want it all, I want it all  
A blade of grass, a grain of sand  
The moonlit sea, to hold your hand  
I want it all, I want it all  
I want it all, I want it all

We got the sunshine  
We got the shade  
We got temptation  
We got it made  
We got rewarded  
We got refused  
We got distorted  
We got confused  
We got the sunshine  
We got the shade  
I want it all, I want it all  
I want it all, I want it all

With eternal love, the stars above  
All there is and ever was  
I want it all, I want it all  
I want it all, I want it all  
A blade of grass, a grain of sand  
The moonlit sea, to hold your hand  
I want it all, I want it all

I want it all, I want it all
