

Beast

Mia Martina

Hey baby, you know I'm a turn you up
Waka Flame, I got you! You know!

No where to run run run, come here right now
Here right now, here right now
There's only one thing that I wanna feel right now
Feel right now, feel right now
You all over my skin, I'm anxious
Paint my body boy, I'll be your canvas
Don't talk to me, just show me your talent
Your talent, ooh oh!
One look and you're mine, keep your eyes on me now
'Cause when the stars align, you might bring the beast out

Nowhere to run run run, come here right now
Right now, right now
'Cause when the sun goes down, the beast comes out
Comes out, comes out
'Cause when the stars align, you might bring the beast out
One look and you're mine, keep your eyes on me
Nowhere to run boy run, come here right now
Right now, right now

Keep my eyes on you, keepin ties to you
Keep aside how deep inside, I be inside of you
Between your thighs I woop, we gon' slide by in that coupe
We gon' weave through all that traffic
I wear ones and I work magic
Too much passion can end up tragic
Just attraction, no attachments, fuck em!

Nowhere to run run run, come here right now
Right now, right now
'Cause when the sun goes down,
The beast comes out, comes out, comes out
'Cause when the stars align, you might bring the beast out
One look and you're mine, keep your eyes on me
Nowhere to run boy run, come here right now
Right now, right now

I'll take you down, down,
Can you keep it up all night, up all night, up all night
I'll turn around, round, baby give me what I like
What I like, what I like
You all over my skin, I'm anxious
Paint my body boy, I'll be your canvas
Don't talk to me, just show me your talent
Your talent, ooh oh

Nowhere to run run run, come here right now
Right now, right now
'Cause when the sun goes down,
The beast comes out, comes out, comes out
'Cause when the stars align, you might bring the beast out
One look and you're mine, keep your eyes on me
Nowhere to run boy run, come here right now
Right now, right now

Nowhere to run boy run, come here right now!
