

Prototype

Mia Martina

And you're so late coming home again
You taste like a night of drinks and your kiss is not the same
Feels like a long, long way from you in this bed
'Cause I'll miss you when you're gone and you're here but it burns the same

What's on your mind? You drifting like a satellite
If you need a better life we should be the prototype
So what's on your mind?
We can make it right
We can make it

If we build this love will come alive
So we can be the prototype
I will, I wanna do it right this time
Yeah we should be the prototype

There's no use be here for this broke piece
If I lay out all on my parts
Maybe we can start with these
No matter how long it takes this time we'll make it worth the wait
If we gonna make this work we gotta redefine the space

What's on your mind? You drifting like a satellite
If you need a better life we should be the prototype
So what's on your mind?
We can make it right
We can make it

If we build this love will come alive
So we can be the prototype
I will, I wanna do it right this time
Yeah we should be the prototype
Ooh, ooh I wanna be the start on something, something new
Ooh, ooh I wanna get it right and build this prototype with you

Prototype, prototype, prototype
We should be the prototype
Prototype, prototype, prototype
We should be the prototype

If we feel this love will come alive
So we can be the prototype
I will, I wanna do it right this time
Yeah we should be the prototype
Ooh, ooh I wanna be the start on something, something new
Ooh, ooh I wanna get it right and build this prototype with you
