Desperate Heart

Michael Bolton

One night, one empty room One man getting over you One star, one lonely moon I make a wish I know will never come true

You'll call my name And you'll beg me to hold you again But the truth remains And I'm only a fool who can't help but pretend

[Chorus] It's all over, but I'm holding on I can't let go till the love is gone It's all over, but I keep holding on With a desperate heart My desperate heart

Some nights I try in my mind To see myself loving someone new Still I know I'm wasting my time No one can ever take the place of you

So I close my eyes I swear I feel you here by my side Bet it's all, it's only a lie That I need to believe for my heart to survive

[Chorus]

All this time I've been drowning in hopeless illusion I've been keeping inside That someday you'll walk out of the shadows And back into my life

[Chorus]

I can't believe your love for me is gone
