

# She Used To Be Mine

Michael Crawford

I understand there's nothing I can do  
I can't be what she needs as long as she needs you  
If you're the one she'll turn to from now on  
There are things that you should know about her when I'm gone

She's not as brave as she might seem  
And when she's had a scary dream  
If you don't hold her, she won't sleep all night

She's not as strong as she should be  
She cries at movies on TV  
And counts on you to see that things go right

But she's a chance to make your dreams come true  
To have someone who thinks there's nothing you can't do  
A chance to live each day and care the way, you always knew you  
could  
Take care of her for me, she used to be mine

She's not her best on rainy days  
She'll test your love a hundred ways  
She plays with your emotions like a song

She chases dreams that can't come true  
And always tries too hard for you  
And never knows just how to say she's wrong

But she's a chance to make your life complete  
A chance to take these lonely days and make them sweet  
A chance to feel so good that everyone will wish they could be  
you  
Take care of her for me, she used to be mine

She'll never leave you anytime alone  
She needs more time and tenderness  
Than anyone you've known

But she's a chance you'll never have again  
A chance that always seems to come to other men  
A chance I can't forget, a chance that I somehow let slip away  
Take care of her for me, she used to be mine
