

Laughing Gas

Michael Franks

I knew from the moment I saw you
My bad luck in love was all in the past
How true, been so high it's unreal
And this feeling reminds me of

How square that our Age is Atomic
It's kind of tragicomic too
But we can laugh away our blues, Babe
Long as it's just Me and You

I fell just like Adam for Evie
When I took one bite of that fruit thou hast
How swell, to be groovin' so easy
Just like we were both sniffin'

We gotta make this feeling last
This feeling's just like laughing gas

This world's full of sadness and sorrow
And poets say happiness never lasts
But Girl, it's today not tomorrow
And we got a full tank of laughing gas
