Let Me Count The Ways

Michael Franks

When I met you I was blind Underneath a dark cloud couldn't find the blue And I wasn't sure quite what to do I wore my heart upon my sleeve

Disappointed I could not believe at last That I had finally shaken off the past with you I don't know how you trapped me All I know is now I'm happy

Let me reveal All the feelings that I feel When I love you Let me count the ways

Let me explain Every image in my brain How I love you Let me count the ways

You are a part Of the rhythms of my heart And I love you Let me count the ways

And when I stray You are never far away Cause I love you Let me count the ways

My love song was never played Till you came along and your love made me ring Now it's only you for whom I sing If I wrote you a different song each day

Still I know I never could repay your love Falling like an angel from above to me And now I'm never lonely, no Now it's forever only you

Let me reveal All the feelings that I feel When I love you Let me count the ways

Let me explain Every image in my brain How I love you Let me count the ways

You are a part Of the rhythms of my heart And I love you Let me count the ways

And when I stray You are never far away

Cause I love you Let me count the ways You can't imagine what your love means It's like the poet says How can I say how much I love thee Let me count the ways Let me reveal All the feelings that I feel When I love you Let me count the ways Let me explain Every image in my brain How I love you Let me count the ways You are a part Of the rhythms of my heart And I love you Let me count the ways And when I stray You are never far away Cause I love you Let me count the ways Let me reveal All the feelings that I feel When I love you Let me count the ways Let me explain Every image in my brain How I love you Let me count the ways You are a part Of the rhythms of my heart And I love you Let me count the ways And when I stray You are never far away Cause I love you Let me count the ways
