

Look Around

Michael Learns to Rock

When you're down
you're feeling better
strolling into the night

There's a place
in electrical weather
shining the bluest of lights in sight

Reaching out
in digital voices
everything is waiting there

If you tried
you couldn't avoid it
Cyber magic is in the air

Uhh
Look around
Phoney love's flying all around tonight
Just look around my friend
Face it Chase it

You are scratching in
the top of the surface
to find that special one

Rushing in
and checking it out
nobody told you that she has gone

The big relief
when reality's biting
Step into the coolest club

This is a place for refugees
but nothing is ever flesh and blood

Uhh
Look around
Phoney love's flying all around tonight
Just look around my friend
Face it Chase it

And they say in a million songs
"Love will find a way"
But I'm scared that they might be wrong today

Look Around...
