

Space Commander

Michael Learns to Rock

She has to pinch my arm
to make sure that I'm awake
The engine's on and it feels like a distant earthquake
I don't believe my eyes
The planets are passing by
I hear she is talking to me
Thunder and lights in her eyes

She's the space commander
Steering our ship
Right across the universe
It's hard to get a grip
She's the space commander
And I can't get my feet on the ground

We descend in a magic world
under the purple skies
The engine's off I am falling free as a bird

Walking on a diamond beach
Light as a butterfly
Somehow she is waving at me
I guess that I need what she does

She's the space commander
Steering our ship
Right across the universe
It's hard to get a grip
She's the space commander
And I can't get my feet on the ground

Every time we fight I disappear into the comfort of a dream
Gotta find a way to make it easy everyday
Just wanna keep this love affair alive
