

## Our Love

Michael McDonald

Lost and lonely lives  
Floating like waves at sea  
We make it day by day  
Watching the world go by

In a moment where time stands still  
From here we look out on forever

Darling, our love  
One love that never fades away  
Our love  
This love will light the world on it's way

Shattered, broken dreams  
Sifting like grains of sand  
We claim it and here we stay  
Watching the world go by

With the strength that we spend in this life  
In the hope that it goes on forever  
We believe as we promise to try, that

In a moment when time stands still  
From here we look out on forever  
And we can see all that time will tell
